

PROJECTION**HOLOSCREEN
INTERACTIVE**

The **MediaScreen WTH 65 Holo Interactive** is an innovative and filigree designed rear projection system with an interactive control interface and 65" screen diagonal by a minimum depth of 22". The control takes place by means of a precise movement sensor with interface to the PC or MAC.

The mechanically coupled screen-projector configuration allows the simple, continuously adjustment of the vertical viewing angle up to 25°. The optionally available and lockable roll stand thereby serves for the safe keeping of content sources such as laptop, DVD or CF Card Players.

FEATURES & FUNCTIONS

- Transparent HoloScreen
- Precise movement sensor inclusive control software
- Universal Interface for PC and MAC
- Control via contact of the transparent image screen
- Brilliant and high-contrast display
- Homogeneous and grid-free display
- Special formats and display format in 16:9 on request.
